                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 2, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 1, Sequence 2, Sequence 1, Sequence 2, Sequence 1, Sequence 2, Sequence 2, Sequence 2, Sequence 2, Sequence 2, Sequence 2, Sequence 2, Sequence 2, Sequence 2, Sequence 2, Sequence 2, Sequence 2, Sequence 2, Sequence 2, Sequence 2, Sequence 2, Sequence 2, Sequence 2, Sequence 2, Sequence 2, Sequence 2, Sequence 2, Sequence 2, Sequence 2, Sequence 2, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequence 3, Sequen

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     GluAsnSerGlySerProGluThrSerArgSerLeuProAlaProGlnAspAsnAspPhe
                                                                                                                                                                                                                                                          Sequence 3, Application US/09865364

Patent No. 6613521

GENERAL INPORMATION:
TITLE OF INVENTION: NOVEL MOLECULES OF THE CARD-RELATED
TITLE OF INVENTION: NOVEL MOLECULES OF THE CARD-RELATED
TITLE OF INVENTION: PROTEIN FAMILY AND USES THEREOF
FILE REFERENCE: 07334-112001
CURRENT APPLICATION NUMBER: US/09/865,364
CURRENT FILING DATE: 2001-05-25
PRIOR FILING DATE: 1998-12-08
PRIOR FILING DATE: 1998-12-08
PRIOR PLILING DATE: 1998-06-17
PRIOR FILING DATE: 1998-06-17
PRIOR PRILING DATE: 1998-06-06
NUMBER OF SEQ ID NOS: 47
SOFTWARE: FESSEQ for Windows Version 4.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Length:

Sequence 1, Application US/09340620A

Sequence 1, Application US/09340620A

Patent No. 6482933

GENERAL INFORMATION:

APPLICANT: Bertih, John

TITLE OF INVENTION: NOVEL MOLECULES OF THE CARD-RELATED PROTEIN FAMILY AND USES THEREC, PILE REPERENCE: 07334-124001

CURRENT APPLICATION NUMBER: US/09/340,620A

CURRENT APPLICATION NUMBER: US 09/245,281

PRIOR PELING DATE: 1999-02-05

PRIOR APPLICATION NUMBER: US 09/207,359

PRIOR APPLICATION NUMBER: US 09/207,359

PRIOR APPLICATION NUMBER: US 09/019,942

PRIOR APPLICATION NUMBER: US 09/019,942

PRIOR APPLICATION NUMBER: US 09/019,942

PRIOR APPLICATION NUMBER: US 09/019,942

PRIOR APPLICATION NUMBER: US 09/019,942

PRIOR APPLICATION NUMBER: US 09/019,942

NUMBER OF SEQ ID NOS: 71

SOFTWARE: FastSEQ for Windows Version 4.0

// Line="Superior Stomach; Vector: pCNS; Site=1: EcoRI;
// Site 2: NotI; The poly (A)+ RNA was dephosphorylated with bacace acid pyrophosphatase (TRAP). The decapped with tabacco acid pyrophosphatase (TRAP) in the decapped inteact mRNA was ligated with DNA-RNA linker including EcoR I site by treatment of T4 RNA ligase and the first strand cDNA was synthesized from oligo dT-selected mRNA by priming with dT-tailed vector. The dT-tailed vector was adjusted to have about 60nt. The cDNA vector was circularized with E. coll DNA ligase after digestion of EcoRI which site is also included in vector. An RNA strand converted to a DNA strand by Okayama-Berg method. The converted to a DNA strand by Okayama-Berg method. The competent cells E. coli Topolof' by electroporation method. The cDNA libraries constructed by this method are full-length enriched CDNA library."
